AQUARIUM

Water you gonna catch?

LIGHTWEIGHT FAMILY FUN CARD GAME

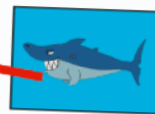

Draw a card....then

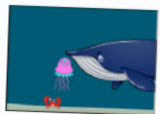

Build it into your aquarium or discard it to draw another

Watch out for sharks because they'll eat your other cards!

Cast nets on other players' turns to gobble up their discards

And collect pairs of boots to unlock special abilities

Game is over when the sunset is drawn

Each creature type scores differently to keep things fresh!

FEATURES:

You are in a fishy business! You only have a few hours and a couple casts of your net in order to catch the best sea creatures for your aquarium. On your turn, draw and discard up to 3 times until you find a card you want; then add the card to your aquarium to score points. But beware—you may get a shark!

Accessible: mostly language independent makes it ready to reach wider markets. Most information is conveyed with graphic design.

New Mechanics, Familiar Feel: featuring a "catch and release" card drawing system. This is paired with pattern building and set collection for a fresh, easy to learn game.

Minimal Components: designed with only 111 cards to make it cheap to print. Perfect fit for a publisher looking for a smaller, low risk project or "mass market" style game.

PLAY NOW:
• Tabletop simulator
• Print and Play
