

You have hit the slots in Vegas only to come across something very interesting: the machines are broken and you can re-spin the individual reels! Now, with enough coins, you can now beat the game for frequent, lucrative jackpots. The only problem: the other players have found this out too and you're racing to collect the most cash before the bank runs empty.

How to play?

- Roll the dice
- Pay to re-roll as much as you want
- Cash out with 3 of a kind jackpot or press your luck with double or nothing!

Most money wins!
